EDUCATION

The Ohio State University

B.S. in Computer Science and Engineering, Economics Minor - 3.55 GPA

Columbus, OH

Aug. 2022 – Dec. 2025

SKILLS

Languages: Python, Java, Go, C, JavaScript, SQL, Ruby, HTML/CSS

Frameworks: Flask, Django, Vue.js, Node.js, Express.js, Hugo, Rails, JUnit

Tools: Git, Linux, Phabricator, Sourcegraph, VS Code, Cursor, IntelliJ, Eclipse

EXPERIENCE

Uber Freight

Jun. 2025 – Aug. 2025

Software Engineering Intern

Chicago, IL

- Crafted a real-time communication system using Go to replace a flaky script, eliminating 60+ monthly timeouts
- Reduced communication latency for critical load changes by 4x by implementing a new event-driven architecture
- Shipped a solution to send 5,000+ emails per week, integrating with Zendesk's API for two-way communication
- Deployed code impacting an annual run-rate of over 60,000 loads, with a full rollout to all Uber Freight carriers
- Led code reviews using Phabricator and managed version control with Git/Sourcegraph, maintaining a high code quality standard

Uber Freight

Jun. 2024 – Aug. 2024

Software Engineering Intern

Chicago, IL

- Developed and refined fraud status mechanisms using Go, reducing overall brokerage fraud by 30%
- Redesigned carrier status architecture, significantly reducing technical debt and improving maintainability
- Engineered automated email communication systems for risky carriers, enhancing reporting efficiency by 50%
- Conducted end-to-end testing using internal tools and reached 100% test coverage, ensuring software reliability

The Ohio State University

Jan. 2023 – Dec. 2023

Undergraduate Teaching Assistant

Columbus, OH

- Clarified complex concepts in Object-Oriented Programming, Java, and data structures for 50+ students in labs
- Graded assignments and provided constructive feedback on coding style and logic, leading to improved student project outcomes
- Hosted regular office hours and ad-hoc mentoring, fostering a supportive learning environment

PROJECTS

osu.space | *JavaScript, Node.js, Vue.js, Git*

Oct. 2023 – May 2024

- Leveraged Vue.js to create an intuitive and responsive UI, enhancing student engagement
- Designed and implemented a robust backend using Node.js to manage and query student data efficiently
- Utilized Git for version control and collaborated with a team on GitHub to manage the project's codebase
- Regularly gathered feedback from users to improve UI/UX elements, resulting in a 20% increase in user satisfaction

Glossary Generator | *Java, HTML/CSS*

Nov. 2022 – Dec. 2022

- Developed a Java-based application that dynamically generates a web-based glossary
- Handled Java I/O for file parsing and dynamically generated interlinked HTML/CSS pages
- Implemented robust error-handling, enhancing user experience and application reliability

LEADERSHIP

OHI/O, Ohio State's Hackathon Club – *Sponsorship Lead*

Aug. 2024 – Present

- Secured over \$100,000 in partnerships with industry leaders for event funding, elevating hackathon impact
- Directed outreach to 100+ corporations, fostering relationships and obtaining sponsorships
